

Medicare Supplement

SunFire is pleased to announce we are launching our new Medicare Supplement product line on our Blaze and Blaze connect platform.

Some Features Include:

Ineligible Medication and Condition by Carrier

SunFire has set up logic to show agents which carriers are best based on their medications and conditions. This helps agents get customers into the right plan and saves them time in the process.

Ineligible Medical Health Questions

Carrier eligibility can also be determined with medical health questions. SunFire uses these questions to help determine which carrier may be a good fit based on current and past health conditions.

Carrier setup includes:

- Aetna
- Aflac (Q4)
- Cigna
- Anthem
- Fallon
- United Healthcare
- Mutual of Omaha
